DETAILED ACTION

Applicant's arguments with respect to claims 35 and 36 have been considered but are moot in view of the new ground(s) of rejection.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the structure of claims 35 and 36 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. It is noted that figure 1 is merely schematic. No chassis structure is shown and it is not even evident that the module is attached to the chassis.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified

Art Unit: 3746

and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 35 and 36 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no basis in the original specification for the structure as recited in these claims.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5, there is no antecedent basis for “said control action and maintenance alarms”.

In claim 25, there is no antecedent basis for “said liquid injection valve”.

Claim Rejections - 35 USC § 102

Claims 1 to 3, 17 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Gunn et al., for the reasons appearing in the prior Office action.

Claim Rejections - 35 USC § 103

Claims 6 to 10, 16, 18, 19, 21 to 23, 25 to 28 and 30 to 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gunn et al. in view of Kauffman et al., for the reasons appearing in the prior Office action.

Claims 4, 5, 20, 29 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gunn et al. in view of Allison et al., for the reasons appearing in the prior Office action.

Claims 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gunn et al. in view of Pham et al., for the reasons appearing in the prior Office action.

Claims 13 to 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gunn et al. in view of Williams et al., for the reasons appearing in the prior Office action.

Claim 35 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gunn et al. in view of Heath et al. Heath et al. disclose a compressor system having control modules which are mounted on a chassis plate (see col. 6, ll. 39 to 54, and col. 9, ll. 14 and 15). This facilitates access and replacement of the components. In view of this teaching, it would have been obvious to form the electronic components of Gunn et al. as a module, and to mount the module on a compressor chassis.

Art Unit: 3746

Claim 36 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gunn et al. in view of Allison et al., as applied to claim 29 above, and further in view of Heath et al., as applied previously.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
